

# PEACEWORK

Build a stronger world . . . .

Engineering and construction projects improve quality of life by providing shelter, transportation, and energy through innovative, sustainable designs and solutions.

## Construction Design and Building Projects

Plan, construct, and/or renovate schools, libraries, playgrounds, childcare centers, community centers, and orphanages.

## Transportation Projects

Design and build roads, pedestrian and vehicle bridges, and sidewalks to better connect people and resources in communities.

## Health and Safety Engineering Projects

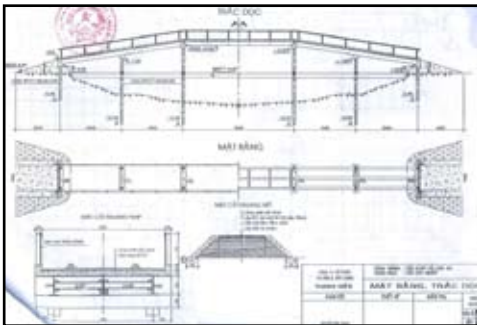

Create structures and systems -- including clean water sources and filtration units, hospitals, medical clinics, fences, waste receptacles, First Aid centers, and latrines -- to improve community health and safety.

## Business and Industry Projects

Implement systems and structures to improve economic opportunities for community members. For example, improve grain mills for better farm efficiency.

## Agriculture Irrigation Systems

Design and build irrigation systems for school and community gardens through the use of rainwater catchment systems.
